TEAM DEVELOPMENT THROUGH CREATIVITY AND PLAY

LEGO® Serious Play | Creative Problem Solving | Creative ARTifacts

DIVERSITY MAKES US STRONGER TOGETHER!

Identify individual qualities, talents, and characteristics that make each person on your team unique and irreplaceable, using LEGO® Serious Play® exercises and interactive play. Then, share ways to activate those advantages to elevate workplace culture and performance.

Create and take home a collage on wood canvas as a reminder of your unique contribution to your team!

LEGO® PROBLEM SOLVING: *Good Ideas Can Come from Any Level of Your Organization*

Have an organizational challenge to overcome? Or an opportunity to think through? Don't do it alone! Generate ideas from all levels of your organization through a facilitated LEGO® Serious Play® workshop, where you will 'think with your hands' to come up with solutions and ideas to challenges and opportunities. It's a great way to cultivate collaboration in a fun and creative environment!

GRID PAINTING: *Creative Together*

This workshop lets you stretch your creative and collaborative muscles. Prior to the workshop, our facilitators work with you to design a large-scale grid painting, in-line with company values or retreat theme. One of our artists will then sketch an image across multiple canvases to create a grid painting. An interactive play and paint session concludes in working together to put the pieces of the painting puzzle together!

ART CONTEST

Have a competitive team? This event taps into creativity and playful competition. Customized to your chosen themes, teams are given basic supplies to create art pieces, while also playing games to earn additional art supplies. The more the better – as you compete to be the most creative and collaborative team!

WEAVE OF DREAMS

Acknowledge past accomplishments through LEGO® builds and some self-reflection. Then, set your sights on new personal and professional goals! Write, weave, and create – as you incorporate your new dreams and goals into a decorative wall hanging.

LISTENING WITH LEGOS® a collaboration with DJ Amani

Learn skills for effective listening and feedback in an interactive presentation. Build LEGO® models to represent current challenges to practice communicating and receiving feedback. And what better way to rehearse listening, than with music! The DJ experience brings this workshop to life – giving groups of participants the chance to select songs that represent communication solutions and present those solutions in a musical performance.

VALUES CUBE

We take a 'bottom up' approach to company values. Because when people feel personally connected to your company's 'why', they can be most effective in their work. We start by identifying personal values before moving onto determining shared values in small groups. Then we tie in how your values line up with company mission and vision.

Create your 'Values Cube' that can be rolled like a dice at your desk each morning to decide on what value you want to focus on today!

Let Us Customize an Experience for Your Team!
